Education

ChungBuk National University
Bachelor of Computer Science
Relevant Coursework: Data Structure, Algorithm, Software Engineering

Cheongju, South Korea
03 2019 – 02 2024

Study Abroad
Study abroad coursework in Angelo State University.
Dean’s List(성적우수자) Spring 2022

San Angelo, TX, United States
01 2022 – 05 2022

SSAFY 12th
Samsung SW Proficiency test level B (2024.09)

Daejeon, South Korea
07 2024 – 06 2025

Experience

Flug Mediaworks
Software Engineer Intern
PHP, JavaScript, MySQL, HTML, CSS

Cheongju, South Korea
07 2021

- Contributed to the back-end and front-end development of the presenting services.
- Fully developed a new feature for the update event in the service despite my intern position.
- Developed the English version of the client’s Korean website.

Project

EnjoyTrip – Travel planner
Java, Spring, MySQL, HTML, CSS, JavaScript

10 2024 – Present

- Refactored SQL schema, improved data structure to support multiple places per plan.
- Developed back-end REST APIs using Spring boot, refactored from Servlet/JSP structure.

Recommade – AI-generated playlist from the image
Python, Django, MySQL, Nginx, Gunicorn, Docker, AWS, Git

06 2022 – 07 2022

- Led back-end development and designed the service architecture.
- Improved API performance by optimizing Gunicorn worker settings, reducing response times by 50%.
- Utilized Docker to improve team productivity and reducing setup time by 70%.

LUNAR AI – AI-based intelligent surveillance system
Python, Django, MySQL

05 2021 – 12 2021

- Developed and optimized API using Django and MySQL for real-time face-detection data.
- Integrated the AI surveillance model into the system.
- Won at Open-source SW 2nd place

Analysis of Solar Power Prediction with Data-Driven Approaches
Python, Pandas

05 2021 – 10 2021

- Pre-processed large weather and solar power datasets using Pandas, ensuring data accuracy and eliminating noise.
- Applied the ARIMA model to predict solar power generation, achieving a 5% improvement in forecast accuracy using differencing.

Skills & Certificates

Technical: Languages (Java, C++), Frameworks (Spring, Django), Databases (MySQL), Others (Docker, AWS, Git)
Language: English (TOEIC 945, OPIc IH), Korean (Native)
Certificate: Engineer Information Processing (정보처리기사, 2023.11)
